PROFESSIONAL SUMMARY

Computer Science undergraduate (B.Tech, 2027) with hands-on experience developing and deploying **Java** and **Spring Boot** backend **REST APIs** with a **React** frontend. Built a **full-stack application** end to end, **deployed it to production** on cloud platforms, **optimized API performance** and database queries through profiling, and wrote an automated unit and API test suite (JUnit 5, Mockito, MockMvc) with 82% JaCoCo instruction coverage. Strong in **Data Structures and Algorithms** (150 LeetCode problems), **Object-Oriented Programming (OOP)**, debugging, problem-solving, and clear communication. Seeking a fresher **Software Development Engineer (SDE)** role to build scalable, reliable software.

TECHNICAL SKILLS

Programming: Java, SQL
Backend & APIs: Spring Boot, RESTful APIs, Spring Data JPA, Hibernate (ORM), MySQL (Relational Database)
Core: Data Structures and Algorithms (DSA), Object-Oriented Programming (OOP), Debugging, Problem Solving
Frontend (familiarity): React, Vite, Axios
Version Control & Tools: Git, GitHub, Maven, IntelliJ IDEA, Postman
Cloud Deployment: Vercel, Render, Aiven
Testing (basic): JUnit 5, Mockito, MockMvc, JaCoCo, Apache JMeter (Unit, API/Controller-layer, Performance/Load, Code-coverage analysis)

TECHNICAL PROJECTS

URL Shotgun | Full-Stack URL Shortener with Click Analytics
Java, Spring Boot, Spring Data JPA, Hibernate, MySQL, React, JUnit 5, Mockito, MockMvc, JaCoCo, JMeter

- Developed **3 RESTful API endpoints** (1 POST, 2 GET) in **Java** and **Spring Boot** for URL creation, **HTTP 302** redirection, and click analytics (IP, User-Agent, referrer, timestamp, click count).
- Implemented request validation and error handling, returning structured **HTTP 400 and 404** responses.
- Integrated a **React (Vite)** frontend with the **REST APIs** via **Axios** and tested the endpoints with **Postman**.
- **Deployed the full stack to production** on cloud platforms: React frontend on **Vercel**, Spring Boot backend on **Render**, and **MySQL** database on **Aiven**, configuring production environment variables and cloud connectivity.
- **Optimized** URL creation by removing a redundant existence-check **database query** found through performance analysis, cutting average latency to **13 ms** and response-time variance by **~39%** over 150 samples.
- Benchmarked REST APIs with Apache JMeter (performance/load testing): 0% errors and 15 ms average response time over 50 samples.
- Wrote automated unit and controller-layer API tests with JUnit 5, Mockito (service layer), and MockMvc (controller layer), reaching 82% instruction coverage tracked with JaCoCo.

EDUCATION

B.Tech in Computer Science, Babu Banarasi Das Northern India Institute of Technology, Lucknow — 2023 – 2027 (Expected)

Intermediate (Class XII), UP Board, Daffodils Convent Inter College — 2023

High School (Class X), UP Board, Daffodils Convent Inter College — 2021

CERTIFICATIONS

- Oracle Cloud Infrastructure 2025 Certified AI Foundations
- Tata – Gen AI Powered Data Analytics Job Simulation

ACHIEVEMENTS & LEADERSHIP

- Solved 150 LeetCode problems across data structures and algorithms.
- Technical Coordinator for College Tech Fest, leading a team of 15 volunteers and coordinating across teams (communication and collaboration).
